Certified Developer

for Microsoft Technologies Sep 2018

ITA – LinkGroup, Belgrade

Certificate No. 023380

About me

Junior .NET developer passionate about building secure, scalable apps across web, desktop, and mobile platforms. Experienced with ASP.NET Core, Razor Pages, Blazor WebAssembly, and .NET MAUI. I enjoy crafting modular dashboards, integrating interactive charts, and exploring cloud-native patterns with Aspire. Always curious, I aim to write clean, maintainable code that solves real problems and delivers meaningful impact.

Work experience

Milsped Group Belgrade	Mar 2022 – Feb 2024
Smiljanic Komerc d.o.o Pozega	Jan 2017 – Feb 2022
Komercijalna banka A.D. Belgrade	Jan 2005 – Jan 2015
Sports betting "Punkt" Belgrade	Nov 2001 – Dec 2002

Production and Service Management	

Project highlights (Github - github.com/RRaleBG)

Booking • Java EE • MySql • Apache

- Designed a reservation system supporting 1,200+ bookings per month.
- Integrated calendar UI with dynamic availability checks to prevent overbooking.
- Implemented role-based access controls and client/server data validation

AdminApp • ASP.NET Core | SQL Server

- Crafted an admin panel for managing 200+ user accounts and content items.
- Implemented role-based access controls and data validation.

Dental-Office • WinForms • SQL Server

- Built a desktop solution to schedule appointments and manage patient records.

AutoOglasi • ASP.NET MVC • SQL Server • Multilayer Architecture

- Developed a multilayered web platform for vehicle listings.
- Optimized search queries to deliver results 50% faster under peak load.
- Implemented role-based access controls and client/server data validation

All-In-Charts • ASP.NET MVC • SQL Server • Multilayer Architecture

This application is a modern business dashboard built with ASP.NET Core Razor Pages (.NET 9), providing interactive analytics and management for the Northwind sample database. It features user authentication, employee and customer management, product and supplier CRUD operations, sales and KPI visualizations, and integrates external APIs for extended data (e.g., pet store). The solution demonstrates advanced data handling, charting, and secure role-based access in a scalable web environment.
